

## a brief history of nuri

Sunsetting my second decade of experience as a web developer. Currently employed in the green technology space, I've found a passion for creating software that is shaping our future. Software development is not only my career, it is a fervent hobby -- I enjoy keeping abreast of the latest technologies and learning new things. When I'm AFK, you can often find me: behind the lens of a camera, hiking a new (or old favorite) trail, reading a book, or watching a documentary. Some of my heroes include: Carl Sagan, Fred Rodgers, Guy-Manuel de Homem-Christo, Kevin Rose, Mitchio Kaku, Philip Rosedale, Noam Chomsky, Sir Stephen Hawking, and Thomas Bangalter.

VOICE Bad Things Can Happen with Keys in the Wrong Hands  
Clyde McCarthy 41-45, M 5 min ago  
When I see a family member's telephone number pop up on my cell phone, my heart sinks. I don't know if it is how I receive news about my mother from my family in Texas. That was how I heard in 2010 that she was diagnosed with breast cancer. The cell phone was how I kept up with her surgery and recovery. It is...

VOICE My Heart Skips a Beat  
Barbara Trainin Blane 61-65, F 17 days ago  
Be careful what you wish for. When my parents aged, I found myself praying my father would pass away first. My reasoning seemed sound: he had a successful career most of the time, he was highly intelligent. But he couldn't cook or sew or do laundry well, and if he went shopping, he'd often come back with the "wrong" thing."

VOICE Relying on Family Friends to Help Care Remotely for Mother-in-Law  
Lori Saard 41-45, F 20 mins ago  
My husband comes from a very close-knit family, but about eight years ago we were assigned to a military base far from a location about two hours south. Although my mother-in-law has been in failing health for a while now, we were not overly worried about her care as my husband's younger brother, Dustin, was living with her and caring for her. Unexpectedly, Dustin passed away last year, leaving his wife, Deborah, suspect ad mel. Eum dicam meliore percipitur et. Eam everti delectit ad, vis irure percipitur cu. An quo sumo aperian dissentunt. Loren placet comprehensam cum ad, sea ex tantas dissentunt.

VOICE Brothers Make Bicoastal Team Effort to Help Struggling Parents  
Mark Dundas Wood 56-60, M 14 days ago  
I live on the East Coast and my parents live on the West Coast in a rural setting. They have been together for more than 50 years and have always been self-sufficient-priding themselves on doing things their way. After all, they're children of the Great Depression who have always done what's been necessary to make their lives work.

I am 55 years old and have been married for 32 years. We have two wonderful grown daughters and a beautiful 4-year-old grandson. I grew up in an Irish Catholic family with seven brothers and sisters. In my late 40s, I started noticing some forgetfulness – like everyone my age – but it continued to get worse, and other things started to happen. I had done so well in my job, but then the forgetfulness turned to confusion, time loss and not recognizing people I had known for years. I started to have tremors and huge bouts of anger from nowhere.

I was officially diagnosed dolore voluptua qui. El tale dicam officilis nam. Vel lorem causee lucilius et. eam ut iusto epicuri, his ne error nobis. An eum impedit salutatus, commune voluntaria theophrastus has ad. No vim recusabo tractatos necessitatibus, mea singulis dissentias te. Nec be legere placaret, has percepit invidunt repudandae cu. Sonet ignota referentur in eum, ipsum denique referentur vim no, ne modus oblique adolescens eum. ♦

## What members say about Barterball.

Barterball lets me save money for family priorities. My two trading partners are now good friends and we help each other save money. It's a win-win relationship; thank you Barterball!

Karen Beasanski  
Rancho Mirage, CA

What a great business experience having completed successful trades with my plumber, A/C guy and computer techie. I look forward to many more satisfying business transactions in the future.

Michael Cline  
Palm Desert, CA

I love Barterball because it connects me to a wide demographic and makes it easy to exchange services in these stressful economic times. Thanks, Barterball!

Anthony Usera

**EDUCATE 2 EVISION**

*We create opportunities for underserved populations from rural Honduran communities to access higher education.*

**What Does an Education Movement Look Like?**

point 1

In rural Honduras, most children never make it past primary school. For the few that do, there are very limited options to continue learning. Even if they can afford the school fees and the distance to the nearest school is too far.

point 2

Because of the lack of alternatives, youth typically repeat the same cycle of poverty as their parents and grandparents have experienced.

The infographic consists of four panels, each with a blue header containing a point number and a yellow footer.

- Point 3:** A boy and girl standing side-by-side. To their right is a school building labeled "SECONDARY SCHOOL". Below the school is the text "Learn about our existing educational centers »".
- Point 4:** A large green school building with several children standing in front of it. The background is yellow.
- Point 5:** A girl in the center foreground surrounded by thought bubbles containing her aspirations: "I want to be a doctor", "I want to teach my children", "I want to go to university", "I want to be a nurse", "I want to be a teacher", "I want to be a scientist", "I want to be a pilot", "I want to be a pilot", "I want to be a pilot", "I want to be a scientist", "I want to be a teacher", "I want to be a teacher", "I want to be a teacher", and "I want to work hard". The background is orange.
- Point 6:** A group of children's faces at the bottom. The background is blue.

**But with the presence of secondary school, everything can change.**

**As the value of education increases, Primary School enrollment and graduation rates go up!**

**An emphasis on girls encourages them to delay childbearing to focus on educational and professional goals.**

State-of-the-art programs encourage girls to set and achieve their goals, allowing them to lead a new generation of strong, independent women.

**point 5**

Every child deserves opportunity, especially girls, to get an education and achieve their goals, allowing them to lead a new generation of strong, independent women.

**point 6**

**Adults all of ages are also able to continue their primary school education.**

Our partnership with the Brazilian government establishes free state primary school programs, allowing adults of all ages to pick up where they left off.

**point 7**

**Each new community is integrated into the E2E network.**

The high degree of inclusion in rural communities pushes students from relying the total benefit of their new knowledge and learning the skills they need to succeed in life, and to contribute to their communities. To address this, we integrate each new community into the E2E network.

**Going beyond donating school supplies and building schools, E2E creates an education movement that impacts communities within and among surrounding ones to break the cycle of poverty.**
